

# Contents

## Applying cognitive science principles in context

- 6 Neuromyths about special educational needs: What should teachers know?  
*Jo Van Herwegen, Michael Thomas, Chloe Marshall and Rebecca Gordon*
- 10 Consolidating learning in Key Stage 5 chemistry  
*Helen Skelton*
- 13 Applying cognitive science principles to primary science  
*Sarah Bartle and Kendra McMahon*
- 17 Using cognitive science principles to design a knowledge-rich primary science curriculum  
*Rebecca Wardell*
- 21 Translating aspects of cognitive load theory into practice: Nuanced results from the worked example effect in South African mathematics classrooms  
*Ashley Abbott*
- 25 From theory to practicals – what does cognitive science suggest for teaching practical science?  
*Adam Stubbs*

## Supporting learning and encouraging independence

- 29 The science of learning: Is it time to bring students into the conversation?  
*Rachael Thornton*

- 32 Using peer teaching to improve effective learning strategies in Year 7 students  
*Claire Badger, Edward Hackett and Caitlin Whitby*
- 34 'Today I've been a Try-o-saur': Embedding self-regulated learning in Early Years classrooms  
*Sayeh Mariner and Matt Shurlock*
- 36 The use of worked examples for novice learners in the Year 10 English classroom  
*Nicole Still*
- 38 'Stepping stones': Using a visual metaphor to manage cognitive load in maths  
*Kirstin Mulholland*
- 40 An exploration of the benefits of small strategies to improve independence for a child with autism and ADHD in a Year 5 maths lesson  
*Jo Mead*
- 43 Regulating learning in the secondary classroom – how does theory reflect reality?  
*Thomas Harriott*

## Research engagement and practitioner enquiry

- 47 Improving classroom practice through meaningful engagement with research-informed teacher enquiry  
*Alexandra Morgan and Emma Jane Milton*
- 51 Using a digital collaboration to translate retrieval practice into classroom practice  
*John Paul Hyatt, Audrey*

*Buchanan, Pilar Arquet, Dougie Beck, Andrew Boulind, Colin Carswell, Jo Clark, Finna Lindsay, Jim McLean, Angela Pearson, Tom Webster and Kim Winchester*

- 55 Developing Professional Creativity: A new approach to CPD  
*Charles Davies*
- 58 Metalinguistic modelling: Applying research to practice in the ITT classroom  
*Laura-Jane Dewamy*
- 60 Exploring the use of simulation in a primary ITE context  
*Kirstin Mulholland, Carl Laake, Sophie Meier, David Nichol, Arlene Anderson, Deborah Heridge and William Gray*

## Cognitive science and beyond

- 63 Raising mathematical attainment from the Early Years  
*Laura A Outhwaite, Erica Ranzato and Jo Van Herwegen*
- 67 Implementing high-quality teaching of disciplinary vocabulary  
*John Rodgers*
- 70 Developing literacy in the drama curriculum at Key Stages 4 and 5  
*Sharon Leftwich-Lloyd*
- 73 Embodied cognition: Enhancing thinking through movement and gesture  
*Christopher Tay*
- 77 What we don't yet know about cognitive science in the classroom  
*Thomas Perry*
